

The Digital Revolution Continues... How Artificial Intelligence is Changing the Way We Do Business

AI is already hard at work across many industry sectors in Quebec and worldwide, providing automated solutions for better decision-making, unprecedented increases in efficiency, and financial savings that will drive the economy forward.

The British Québec Coalition is a trade organization that promotes reciprocal business and exchanges between Quebec and UK companies and institutions

Quebec and UK are both recognized leaders in field. UK companies are world renowned for their breakthrough technology, cutting edge science, energy solutions, and solving problems in both industry and society. Similarly, in Quebec, Montreal is evolving as an international AI powerhouse with growing recognition of its great talent pool.

Join senior management professionals to learn from our top level AI experts from Quebec and the UK as well as C-suite speakers representing major businesses that will help you refine your AI business strategy. The agenda is packed with top-rate presenters who will inform you on latest breaking AI technology and how and when it can be implemented to grow your business.

In this highly interactive day of learning and networking, speakers will discuss and debate the nature of AI, as opposed to AI hype, the business opportunities and challenges, as well as the impact on employment and society as a whole and more.
